Listening Music
Meet new people everyday

## AWARDS

## SKILLS

**Expertise:** HTML, CSS, JS, Bootstrap, Tailwind, Material ui, React, Rest api,
**Comfortable:** Mongodb, nodeJs, express js, jwt, Redux, redux-toolkit

## MY PROJECTS

### SnapBlog –share articles
client || server || Live link
Here users can post their views as an article. They also can update and delete post of their own. They can not delete or update another user's post. I added authorization with JWT and managed states with Redux.

### Netflix Clone
client || Live link
I implemented login system with firebase auth. And redux-toolkit foruser state management. Completely mobile responsive

### To-do app
client || Live link
Here users can add, update and delete their daily tasks. And mark as completed after the task have been done. I used localstorage to store the data.
